

# 4/3 - 4/2 Directional valve elements with or without secondary relief valves, with or without LS connections

L8\_10... (ED1-Z)

**RE 18301-01**

Edition: 09.2018

Replaces: 02.2016

Size 6

Series 00

Maximum operating pressure 310 bar (4500 psi)

Maximum flow 30 l/min (7.9 gpm)

Port connections G 3/8 - SAE6

## General specifications

Valve elements with solenoid operated directional spool. Control spools operated by solenoids with removable coils.

In the de-energized condition, the control spool is held in the central position by return springs.

Wet pin tubes for DC coils, with push rod for mechanical override; nickel plated surface.

Coils can be rotated 360° around the tube; they can be energized by AC current through special connectors with rectifier (RAC).

Manual override (push-button or screw type) available as option.

### Symbols

- 1) The required hydraulic symbol and spool variant can be chosen by consulting page 3.
- 2) Available only for A, B, E and F spool configurations. See page 9 for code details.
- 3) The secondary valves have a maximum flow capacity of 6 l/min (1.6 gpm).
- 4) Without secondary valves (versions L80\_; L84\_), the standard configuration corresponds to "0".
- 5) For connectors ordering code see data sheet RE 18325-90.

Spool variants

## Functional description

The sandwich plate design directional valve elements L8\_10... are compact direct operated solenoid valves which control the start, the stop and the direction of the oil flow. These elements basically consist of a stackable housing (1) with a control spool (2), one or two solenoids (5), and one or two return springs (4).

When energized, the force of the solenoid (5) pushes the control spool (2) from its neutral-central position “0” to the required end position “a” or “b”, and the required flow from

P to A (with B to T), or P to B (with A to T) is achieved. Once the solenoid is de-energized, the return spring (4) pushes the spool thrust washer (3) back against the housing and the spool returns in its neutral-central position.

Each coil is fastened to the solenoid tube by a ring nut (6). A pin (7) allows to push the spool (2) in emergency conditions, when the solenoid cannot be energized, like in case of voltage shortage.

- 1 Solenoid tube Ø 14 mm (0.55 inch).
- 3 Ring nut for coil locking (Ø 24 mm); torque 3-4Nm (2.2-3 ft-lb).
- 4 Flange specifications for coupling to ED intermediate elements.
- 5 For tie rod and tightening torque information see data sheet RE 18301-90.
- 6 Four threaded holes M5 for fitting a secondary flangeable element. Bolts M5 with recommended strength class DIN 8.8: torque 5-6 Nm (3.6-4.4 ft-lb).

- 7 A and B ports.
- 8 O-Rings for P and T ports.
- 9 Clearance needed for connector removal.
- 10 Identification label.

- 11** Flange specifications for coupling to ED intermediate elements.
- 12** For tie rod and tightening torque information see data sheet RE 18301-90.
- 13** Optional push-button manual override, OP type, for spool opening: it is pressure stuck to the ring nut for coil locking. Mat no. R933000042.
- 14** Optional screw type manual override, OF type, for spool opening: it is screwed (torque 6-7 (4.4-5.2 ft-lb)) to the tube as replacement of the coil ring nut. Mat no. R933000021..
